

PROJECT 18

Project #18

Write SQL queries for (i) to (iv) and write outputs for SQL queries (v) to (viii), which are based on the table given below:

Table: TRAINS

TNO	TNAME	START	END
11096	Ahimsa Express	Pune Junction	Ahmedabad Junction
12015	Ajmer Shatabdi	New Delhi	Ajmer Junction
1651	Pune Hbj Special	Pune Junction	Habibganj
13005	Amritsar Mail	Howrah Junction	Amritsar Junction
12002	Bhopal Shatabdi	New Delhi	Habibganj
12417	Prayag Raj Express	Allahabad Junction	New Delhi
14673	Shaheed Express	Jaynagar	Amritsar Junction
12314	Sealdah Rajdhani	New Delhi	Sealdah
12498	Shane Punjab	Amritsar Junction	New Delhi
12451	Shram Shakti Express	Kanpur Central	New Delhi
12030	Swarna Shatabdi	Amritsar Junction	New Delhi

Table: PASSENGERS

PNR	TNO	PNAME	GENDER	AGE	TRAVELDATE
P001	13005	R N AGRAWAL	MALE	45	2018-12-25
P002	12015	P TIWARY	MALE	28	2018-11-10
P003	12015	S TIWARY	FEMALE	22	2018-11-10
P004	12030	S K SAXENA	MALE	42	2018-10-12
P005	12030	S SAXENA	FEMALE	35	2018-10-12
P006	12030	P SAXENA	FEMALE	12	2018-10-12
P007	13005	N S SINGH	MALE	52	2018-05-09
P008	12030	J K SHARMA	MALE	65	2018-05-09
P009	12030	R SHARMA	FEMALE	58	2018-05-09

- (i) To display details of all Trains which starts from New Delhi
- (ii) To display PNR, PNAME, GENDER and AGE of all passengers whose AGE is below 50
- (iii) To display total numbers of MALE and FEMALE passengers
- (iv) To display records of all passengers travelling in trains whose TNO is 12015

1. Creating table trains and inserting the values

```
create table trains(tno int, tname varchar(50), startpoint varchar(50), endpoint varchar(50));
insert into trains values (11096,'ahimsa express','pune junction','ahmedabad junction'),(12015,'ajmer shatabdi','new delhi','ajmer junction'),
(1651,'pune hbj special','pune junction','habibganj'), (13005, 'amristar mail','howrah junction','amristar junction'),
(12002,'bhopal shatabdi','new delhi','habibganj'),(12417,'prayag raj express','allahabad junction','new delhi'),
(14673,'shaheed express','jaynagar','amristar junction'), (12314,'sealdah rajdhani','new delhi','sealdah'),
(12498,'shane punjab','amristar junction','new delhi'),(12451,'shram shakthi express','kanpur central','new delhi'),
(12030,'swarna shatabdi','amristar junction','new delhi');
```

26	10:17:50	create table trains(tno int, tname varchar(50), startpoint varchar(50), endpoint varchar(50))	0 row(s) affected	0.047 sec
27	10:17:53	insert into trains values (11096,'ahimsa express','pune junction','ahmedabad junction'),(12015,'ajmer shata...	11 row(s) affected Records: 11 Duplicates: 0 Warnings: 0	0.000 sec

2. Creating table passengers and inserting the values

```
create table passenger (pnr varchar(10),tno int,pname varchar(50),gender varchar(15),age int,travel_date date);
insert into passenger values ('p001',13005,'r n agrawal','male',45,'2018-12-25'),('p002',12015,'p tiwary','male',28,'2018-11-10'),
('p003',12015,'s tiwary','female',22,'2018-11-10'), ('p004',12030,'s k saxena','female',42,'2018-10-12'),
('p005',12030,'s saxena','female',35,'2018-10-12'), ('p006',12030,'p saxena','female',12,'2018-10-12'),
('p007',13005,'n s singh','male',52,'2018-05-09'), ('p008',12030,'j k sharma','male',65,'2018-05-09'),
('p009',12030,'r sharma','female',58,'2018-05-09');
```

29	10:20:50	create table passenger (pnr varchar(10),tno int,pname varchar(50),gender varchar(15),age int,travel_date ...	0 row(s) affected	0.031 sec
30	10:20:52	insert into passenger values('p001',13005,'r n agrawal','male',45,'2018-12-25'),('p002',12015,'p tiwary','mal...	9 row(s) affected Records: 9 Duplicates: 0 Warnings: 0	0.016 sec

3. To display details of all trains which starts from new delhi

```
-- To display details of all trains which starts from new delhi
select distinct t.tno, t.tname from trains t where startpoint='new delhi';
```

Result Grid		Filter Rows:
	tno	tname
▶	12015	ajmer shatabdi
	12002	bhopal shatabdi
	12314	sealdah rajdhani

4. To display pnr, pname, gender and age of all passengers whose age is below 50

```
-- To display pnr,pname,gender and age of all passenger whose age is below 50  
select p.pnr, p.pname, p.gender, p.age from passenger p where age<50;
```

Result Grid				
Filter Rows:				
	pnr	pname	gender	age
▶	p001	r n agrawal	male	45
	p002	p tiwary	male	28
	p003	s tiwary	female	22
	p004	s k saxena	female	42
	p005	s saxena	female	35
	p006	p saxena	female	12

5. To display total number of male and female passengers

```
-- To display total number of male and female passenger  
select p.gender, count(*) as Total_Passenger from passenger p group by p.gender;
```

Result Grid		
Filter Rows:		
	gender	Total_Passenger
▶	male	4
	female	5

6. To display records of all passenger travelling in trains whose tno is 12015

```
-- To display records of all passenger travelling in trains whose tno is 12015  
select p.pname, p.gender,p.age from passenger p where tno=12015;
```

Result Grid			
	pname	gender	age
▶	p tiwary	male	28
	s tiwary	female	22
